GROWDER
• SUMATECL

EQUIPO :

- MATIAS RIOS
- BRYAN SILVA
- MATIAS MEDINA
- IGNACIO MANRIQUEZ

Metodología de trabajo

1

Scrum adaptado

Metodología ágil utilizada para organizar el desarrollo en iteraciones y priorizar el trabajo del equipo.

2

Roles definidos

Product Owner, Scrum Master y responsabilidades técnicas distribuidas entre los integrantes.

3

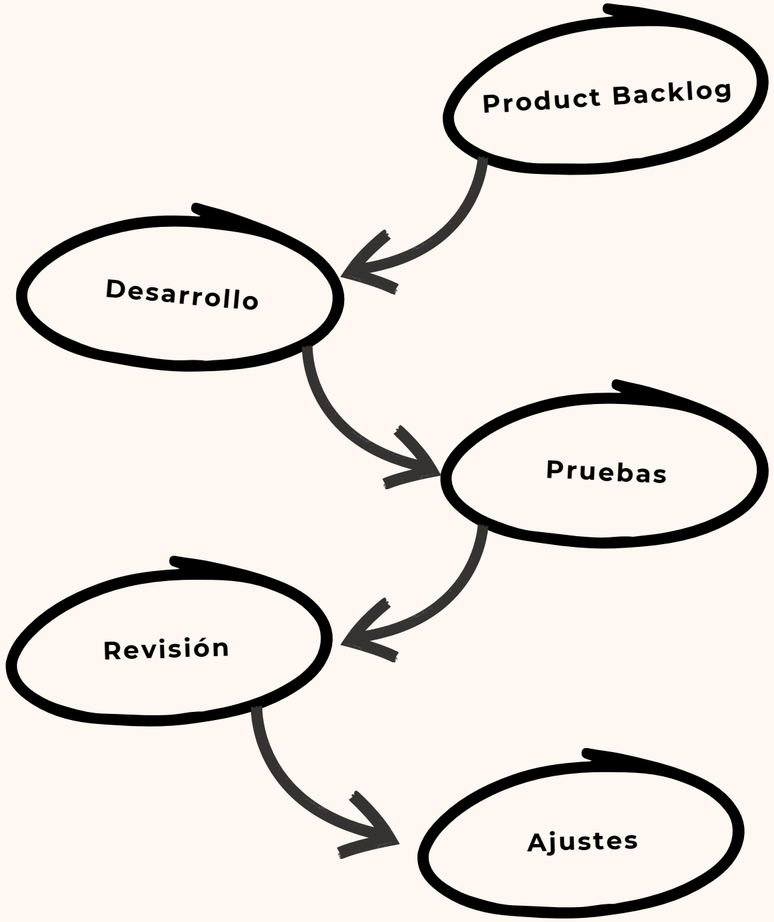

Product Backlog

Lista priorizada de funcionalidades, tareas y mejoras necesarias para desarrollar GROWDER.

4

Seguimiento y mejora

Revisiones periódicas, pruebas y ajustes según el avance y la retroalimentación recibida.

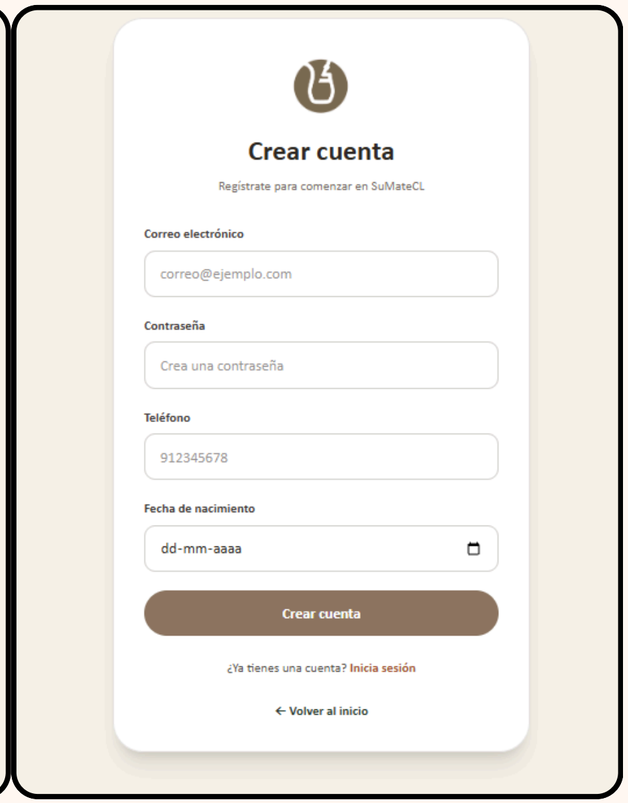

El proyecto se presenta como una metodología ágil basada en Scrum y adaptada al contexto académico
